En Zuo

Shopify Developer | Theme Customization, Storefront UX & E-commerce Optimization

PROFESSIONAL SUMMARY

Shopify developer focused on building clean, conversion-ready storefronts, custom Liquid sections, reusable theme templates, and e-commerce pages that are easy for store owners to manage. Experienced across Shopify agencies and digital teams, with practical strength in storefront UX, app-supported workflows, SEO-aware structure, and responsive page delivery.

PROFESSIONAL EXPERIENCE

Populis Digital | Shopify Developer

Jan 2025 - Dec 2025

- Focused on Shopify storefront delivery, conversion page refinement, reusable theme components, and e-commerce UI improvements for client-facing digital commerce projects.
- Built and customized homepages, product pages, collection pages, promotional areas, and campaign landing pages using Shopify themes, Liquid templates, metafields, navigation structures, and app-based features.
- Improved mobile layouts, spacing, typography, image presentation, and product-flow clarity so stores felt polished and easier for customers to use.
- Supported SEO-ready page structure, tracking implementation, analytics setup, QA checks, and launch preparation for Shopify and e-commerce websites.

HKGSEO | Shopify / E-commerce Developer

Mar 2022 - Jul 2023

- Worked at the intersection of Shopify development, SEO implementation, and digital marketing requirements, helping stores become clearer, faster, and easier to manage.
- Customized Shopify themes with Liquid, HTML, CSS, and JavaScript while keeping frontend changes manageable for non-technical store owners.
- Created and refined landing pages, product/category structures, menus, banners, collection displays, and reusable content areas aligned with SEO and conversion goals.
- Integrated marketing and analytics scripts, supported app configuration, and helped ensure product data, metadata, and visual content were structured correctly.

Dianify | Junior Shopify Developer

Jun 2020 - May 2021

- Started in practical Shopify development by supporting theme customization, store setup, UI fixes, and e-commerce feature implementation for client stores.
- Assisted with Shopify store setup, theme configuration, product/collection setup, page content organization, and basic app integrations.
- Implemented frontend changes in Liquid, CSS, and JavaScript, including banners, product sections, homepage modules, and mobile layout refinements.
- Fixed visual bugs, improved spacing and responsiveness, tested pages across devices, and supported launch-ready quality checks.

SELECTED CAPABILITIES

Shopify Theme Work

Liquid sections, templates, metafields, product pages, collection pages, and reusable storefront components.

SEO & Analytics Support

SEO-friendly structure, metadata checks, tracking scripts, Search Console, and Google Analytics setup.

Conversion-Focused UX

Cleaner navigation, page hierarchy, mobile layouts, landing pages, and product discovery flows.

App & API Workflows

Shopify app setup, REST/GraphQL basics, webhook-aware workflows, and third-party integration support.

SHOPIFY PROJECT FOCUS

Storefront Builds

Shopify stores, theme customization, homepage modules, product pages, and brand landing pages.

Content & SEO Delivery

SEO-aware page structure, content sections, metadata support, schema-ready layouts, and analytics checks.

E-commerce Optimization

Mobile-first improvements, CRO structure, product flow, navigation, and checkout-supporting pages.

Client-Ready Handover

Clean theme setup, editable sections, documentation, QA checks, and practical handover support.

DELIVERY STYLE

- Starts with store goals, theme structure, app requirements, page priorities, and launch expectations before implementation begins.
- Builds Shopify work that is clean, responsive, editable by store teams, and practical for future marketing or product updates.
- Balances visual quality with reliable e-commerce logic, so final stores support both brand presentation and customer conversion.
